

**NEW FROM
GATES**

BELT ACCESSORY & COOLING SYSTEM TOOLS

GATES PROFESSIONAL TOOLS

ACCESSORY DRIVE TOOLS

SONIC BELT TENSION TESTER.
PART No. STT-1

DRIVE ALIGN LASER ALIGNMENT TOOL.
PART No. 91006

COOLING SYSTEM TOOLS

COOLING AND BATTERY REFRACTOMETER.
PART No. 91001

AIR LIFT COOLING SYSTEM VACUUM
FILL TOOL. PART No. 91003

A new range of quality tools designed to let you work faster, smarter & better.

GATES AUSTRALIA

1-15 Hydrive Close, South Dandenong VIC 3175

ACCESSORY DRIVE TOOLS

SONIC BELT TENSION TESTER.

Allows fast verification of the correct tension level for all fixed tensioner, timing belt applications. Simply enter the Gates timing belt part number, hold the sensor over the top of the belt part number and give the belt a flick. The correct tensioner can be set in seconds. Eliminate the primary cause of premature timing belt failure!

PART No. STT-1

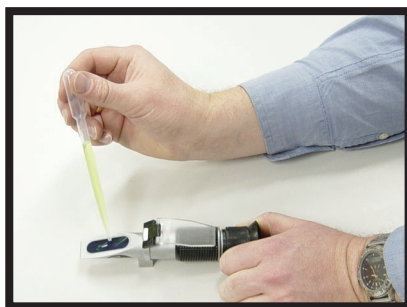

DRIVE ALIGN LASER ALIGNMENT TOOL.

Quickly identifies the two most common types of pulley misalignment - parallel and angular - that reduce belt and pulley service life & produce unwanted noise. Position the tool in the grooves of the pulley and aim the laser at an opposite pulley. Any misalignment is instantly visible. This exclusive, patented Gates tool is compatible with all automotive micro-v drives.

PART No. 91006

COOLING SYSTEM TOOLS

COOLING AND BATTERY REFRACTOMETER.

Ensures adequate freeze and boil-over protection by accurately testing glycol concentrations of radiator coolant. Maintain effective cooling system performance and eliminate risks of engine damage from electrolysis, cavitation and corrosion. Also measures state-of-charge and specific gravity for electrolyte in leads-acid batteries.

PART No. 91001

AIR LIFT COOLING SYSTEM VACUUM FILL TOOL.

Purges problematic air locks, checks for leaks and quickly and easily refills the cooling system. Eliminates the need to bleed cooling systems by filling all areas to 100% capacity. The Gates Airlift tool features a "cone" design connector that can be used on all radiator fill neck applications.

PART No. 91003

**The most trusted
name in belts and hose.**
