

CDX™ CenterTrack
Lightweight and superior durability in all environments including MTB, Trekking, Pavement and Urban.

CDC™ Mudport
Quiet, smooth, durable performance for commuters and pavement bikes as well as tandems.

CLEAN

Carbon Drive requires no greasy lube - no grease stains on clothing or dirty hands. Perfect for commuters. Sheds dirt and grime better than a chain and cleaning is easy with just a quick squirt from the hose - no degreasing or lubing. Just get on it and ride.

QUIET

Bomb down the mountain and experience the lack of chain clatter. Sweep down the street and enjoy the sounds of the city. Gates Carbon Drive is the antidote for drivetrain noise. It's so surprisingly quiet and smooth - you've got to ride it to believe it.

LIGHT

Gates Carbon Drive weighs approximately 240 grams - half the weight of a chain drive. Lighter weight means higher performance. For urban commuters, it means getting to the office faster with less effort. For singlespeed mountain bikers and racers, the weight savings means less weight to slow you down.

STRONG

Mash up the steepest hills and feel the power transfer from legs to wheels. This instant engagement and smooth feel is unlike anything you've experienced before. The strong carbon fiber cords embedded in the Gates Carbon Drive belt result in no stretch and - unlike a chain - no "weak links" to fail.
