

ACCELERATE 30-30-30 TRAINING - ABDS

INCREASE YOUR WORKSHOPS PROFITABILITY

DIAGNOSE DRIVE BELT PROBLEMS AND INCREASE REVENUE

It's a fact, 1 in 5 vehicles need a new belt. Advances in technology have seen big leaps forward in the material used to manufacture serpentine belts often used on the engine accessory drive, more commonly called the **Accessory Belt Drive System (ABDS)**.

Critical to the vehicles performance the alternator, power steering pump, air conditioning compressor and water pump are typically driven by a multi-ribbed belt via the crankshaft. If any of these components fail, the car will not function optimally. Belt construction has changed from Neoprene to EPDM that is much longer lasting and rarely shows visual symptoms of wear.

To assist workshops diagnose drive belt problems more effectively Gates is excited to introduce **Accelerate 30-30-30**, a new training series for technicians that highlights critical new information on engine systems.

The Gates **Accelerate 30-30-30** training program is specific, short, sharp and to the point. In just 30 minutes, you and your staff will discover techniques to improve the accessory belt drive system. Our goal is to help you increase profits by 30% within 30 days just by using Gates products and our diagnosis process.

Topics include:

- > Belt wear
- > Tensioners
- > Misalignment & Tension Tools
- > Slip & Loss of Tension
- > Construction Components

BOOK YOUR TRAINING NOW

Simply go online, register your details and a Gates representative will contact you to organise the session: <http://info.gates.com/Accelerate30> or call +61 3 9797 9666.
