

RADIATOR HOSE PACK

Introducing the NEW Radiator Hose Packs (upper and lower hose plus clamps).

THE OPPORTUNITY

Failure rates on radiator hoses increase dramatically after four years in operation. This is relevant to all coolant hose, but especially the upper and lower radiator hoses.

The primary cause of radiator hose failure is an electrochemical attack on the rubber compound of the hose (called electrochemical degradation, or ECD). This attacks the hose from the inside out, and as such it is not easily visible to the eye until it is too late.

Too often, when it is time to replace a hose (usually because it has already failed), only the affected hose is replaced, and this significantly increases the risk of failure on the other hose which remains in place. This is risky practice, and can certainly lead to problems, and unsatisfied vehicle owners.

THE SOLUTION

- Gates NEW Radiator Hose Packs provide vehicle application specific, upper and lower radiator hoses and clamps for a perfect fit every time.
- Gates Radiator Hose Packs offer real value and convenience, and take the effort away from sourcing the individual hoses and clamps.
- They include quality solid band (non-perforated) hose clamps which provide a secure fit without damaging the hose.
- As you would expect, the Gates hoses included in the packs meet SAE 20R3 & 20R4 Type EC Class D-1 and D-2 specifications, and are engineered to resist electrochemical degradation.
- A basic fitting guide is also included with the packs.

Gates Radiator Hose Packs - So simple, yet so important.

Another innovative solution, available from Gates.

RADIATOR HOSE PACK

MAKE	MODEL	ENGINE	YEAR	RADIATOR HOSE PART NO.	DESCRIPTION	IDEAL CLAMP 1 PART NO.	IDEAL CLAMP 2 PART NO.	GATES PART NO.
