WATER PUMPS

KEEP YOUR COOL

We all know that Gates products are made to high standards.

For example, Gates hoses are engineered to resist electrochemical degradation (ECD), which is the gradual attack on the rubber compound of the hose from the inside out, as such it is not easily visible to the eye until it is too late. Gates proprietary hose construction [called ECR] was introduced many years ago to resist the leading cause of hose failures.

The same high standards are enforced on all Gates cooling system products which today include Water Pumps, Hose Clamps, Thermostats, Heater Valves and a significant range of Automotive Hoses.

Gates designs replacement products for the cooling system to operate seamlessly together and perform exactly as they should – just like the genuine product [or better].

These high standards help deliver a reliable cooling system which operates at a controlled cool temperature.

When the heats on, trust Gates to help keep you cool.

ECR+TM
electrochemical
resistant PLUS

**TRUSTED BY MAJOR VEHICLE MANUFACTURERS.
RECOMMENDED BY QUALITY MECHANICS.
RELIED ON BY MOTORISTS.**

To find out more about the importance of checking and replacing cooling system components and for more information on the Electrochemical Resistance Plus technology visit www.GatesAustralia.com.au

Gates has been producing the highest quality automotive products for over 100 years, and supplies the world's largest car manufacturers with automotive products that they need. This product is made to the same high standards and specifications as the parts supplied to the car manufacturers [OEM].

GENUINE PERFORMANCE:

- > Gates is an original equipment manufacturer [OEM]. This helps ensure that products perform exactly as the original supplied to car manufacturers
- > Water Pumps use unitised bearings and seals for longer service life, and have precision ground surfaces for proper fit and sealing.
- > This product is backed by a strong warranty [2 years / 40,000 kms]

RELIABLE OPERATION:

- > Gates are prime manufacturers of Water Pumps allowing better control of the manufacturing process and quality of product.
- > Gates Water Pump components, such as the seals and bearings, are 100% leak tested. The finished product is also 100% leak tested for both the casting and assembled water pump.
- > You can be confident Gates Water Pumps will perform exactly as they should.

POWERCLEAN™ FLUSH TOOL

A COOLING SYSTEM FLUSH IS AN IMPORTANT STEP IN THE PROCESS

Gates recommends a cooling system flush before the installation of a water pump. This helps remove any accumulated sludge and scale deposits within the existing cooling system that can affect its performance, and compromise the water pump.

Gates Power Clean™ Flush Tool [Part Number 91002] has a patented process that “water hammers” the impurities without the use of harsh chemicals or solvents. The process allows air to pressurise the water creating a pulsating action to scrub deep into corners and crevices, eliminating trapped debris. It cleans radiators, heat exchangers, hoses and engine blocks more effectively than conventional flushes, and maintains system integrity to ensure warranty coverage on replacement parts, including water pumps.

Watch a video on the
Gates PowerClean™
Flush Tool.

GATES COOLING SYSTEM PRODUCTS

This Water Pump program from Gates compliments an extensive range of associated Cooling System products including:

- Radiator hose
- Radiator hose packs
- Cooling system hose packs
- Heater hose
- Heater valves
- Thermostats
- Clamps
- And more
