DRIVEN BY POSSIBILITY™

SUPERIOR TECHNOLOGY

PROVEN FLEETRANNER PERFORMANCE IN ONE EASY-ORDER KIT

Downtime is the enemy for over-the-road fleet operations. Install Gates Complete Heavy-Duty Serpentine Kits and have complete confidence in a complete repair.

WHY KITS?

NOTHING BEATS COMPLETE. Gates Complete™ Serpentine Kits offer:

- Increased ticket value and shop profitability
- Reduced comebacks and warranty returns
- Maximized customer satisfaction
- All necessary OE-quality parts for a complete system restoration
- Simple ordering - no more sourcing parts separately

SYSTEM COMPONENTS ARE DESIGNED TO WORK AND WEAR TOGETHER

It's important to use a systems approach when you diagnose and service the serpentine belt drive. When a high kilometre belt is replaced, the tensioner has likely met its life cycle as well. Replacing the tensioner is critical to avoiding breakdowns.

Fleet managers trust Gates for the highest quality parts, comprehensive training, and superior engineering support. Contact your Gates representative and learn how you can benefit from one-number, Complete Serpentine kits.

- FleetRunner™ belts are engineered to handle high kilometre, high idle times and high temperatures in abusive environments.
- FleetRunner™ belts last 34% longer than OE, and 4 times longer than any other after market belts
- Tensioner round spring design and patented damping mechanism extends tensioner life - up to 3 times longer than any other aftermarket tensioner

GATES SOLUTIONS: BETTER THAN OE

The OE tensioner for the Detroit Diesel Series engines is slow to react to shocks in the serpentine system and susceptible to alignment issues due to an inadequately robust pivot bushing. The tensioners' hydraulic strut required a core charge with each purchase. Gates' redesign includes a more-responsive spring, double-row bearings, patented damping system and seal, and eliminates the strut and core charge. Just one example of Gates' superior engineering design.
